

Wireless

LETNET WIRELESS

LeTourneau University offers wireless networking to faculty, staff, and students at all campus sites. LetNet Wireless is a secured network that requires you to authenticate using your LetNet username and password. In certain parts of the network, your computer may need to be registered in order to connect.

Instructions for connecting to LetNet Wireless

- Make sure your computer and wireless network card support PEAP authentication.
- Change the name of your computer so that it matches your LetNet username
- Be familiar with the [LetNet Policies and Procedures](#)
- Configure your network card using the following [basic settings for connecting to LetNet Wireless](#).
- Use your LetNet username and password when authenticating.

For support issues not addressed by the Knowledge Base, please contact the IT Helpdesk at support@letu.edu or x3500.
