

# LETU MFA Hardware Tokens

If you don't wish to use your smartphone as your MFA device, you can use a programmable hardware token. You must be [enrolled in LETU MFA](#) to use a hardware token.

LETU currently supports the use of the Token2 programmable tokens with time sync:

- [Compatible Token2 Programmable Tokens](#)

*Any hardware token on the page above should work with LETU MFA, however we recommend the **Token2 miniOTP-3 programmable card with restricted time sync** (branded or nonbranded depending on color preference)*

- [Instructions for setting up Token2 tokens for LETU MFA](#)
